

Innovation That Works™

STATEMENT on ASBESTOS

It is the Policy of KIC to design and manufacture products that ensure the Safety of our Employees, our Customers, and our Environment.

The use or exposure to the Amosite, Chrysotile, or Crocidolite forms of Asbestos materials are known to be potentially harmful to humans. KIC has a policy that prohibits the use of all Asbestos materials.

All KIC products and packaging materials have been designed and manufactured using materials that are known to be free from Asbestos materials. A review of materials actually in use has confirmed that materials are Asbestos free.

Please contact the undersigned at KIC if you would like further information.
